Sample training content for learning MkDocs: convert this PDF into Markdown under docs/.

Why structure matters

MkDocs works best when articles use consistent headings, short procedures, and clear titles. These source files are practice content to convert into Markdown pages.

Article template

- Title: task-oriented (e.g., Reset your VPN client)
- Summary: 1-2 sentences
- Before you begin: prerequisites
- Steps: numbered, one action each
- Result: what success looks like
- Related articles: links

Style rules

- Use active voice and second person (you)
- Prefer screenshots only when UI is non-obvious
- Mark severity of risk with callouts (warning/note)
- Review quarterly or after major product changes

MkDocs learning tip

When you convert this PDF to Markdown, map each section heading to ## or ### and turn bullet lists into Markdown lists. Place the page under docs/service-desk/ in your MkDocs project.
